ARTIST STATEMENT

Holding onto my fascination with aesthetics from the early 2000s, I distorted VHS footage of a dance festival in 2001. I am drawn to the imperfections that the analogue medium contains. They feel so familiar and bring up memories from early childhood. These recollections are incredibly vivid, and suddenly, there is a need to re-experience the past. The dance performance is taken from my mother's archive. Hither & Thither is my attempt at play.
